Webhook Registration:

The screenshot shows the NgPayments application interface. On the left, there is an 'API Configuration' section with a text input for 'API Host URL' containing 'http://localhost:8080' and a 'Save Configuration' button. On the right, there is a 'Webhooks' section with a 'Create Webhook' form. The form has a 'Webhook URL' input field containing 'http://testurl.com', a 'Create Webhook' button, and a 'New' button. Below the form, a green message box says 'Webhook created successfully!'.

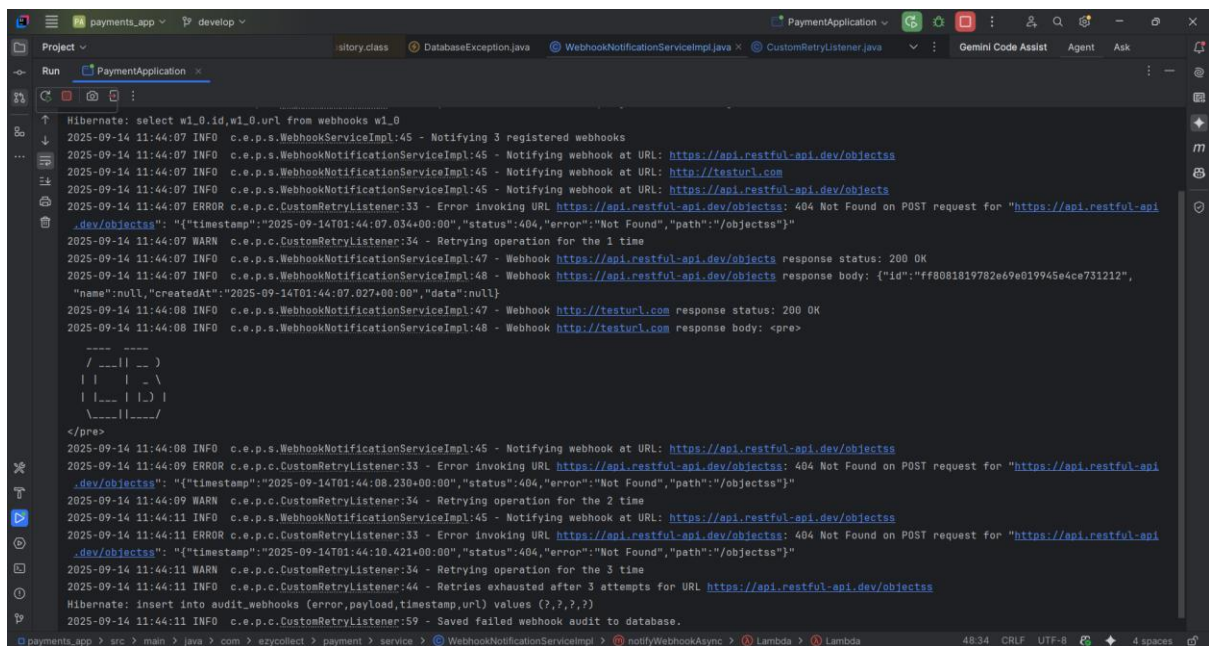

## Webhook DB Insert

The screenshot shows the Supabase dashboard for the 'payments' project. The 'webhooks' table is selected, and the 'Insert' button is highlighted. The table contains 7 records with columns 'id' and 'url'.

id	url

The screenshot displays the Supabase dashboard interface. At the top, the navigation bar shows the project name 'payments' and the selected table 'audit\_webhooks'. The main content area shows a table of API error logs. The table has columns for 'id', 'error', 'payload', 'timestamp', and 'url'. The error messages are '404 Not Found on POST request for https://api.restful-api.dev/objects' with various request IDs and parameters. The url column shows the API endpoint being accessed.
